Script for Administering the Accommodated Computer-Based Grade 7 FSA Mathematics Practice Test

This script should be used to administer the Grade 7 FSA Mathematics Practice Test to students who will take a computer-based practice test with text-to-speech and/or masking accommodations via the FSA Secure Browser. Please note that text-to-speech is only available when using the secure browser; it is not available when taking a practice test with an Internet browser.

Students must be assigned accommodations in TIDE prior to testing. This script directs test administrators to provide test tickets for students, and accommodations assigned in TIDE are automatically set when students sign in with test tickets. You may administer the practice test without test tickets. If students do not use tickets, you will need to modify this script to direct students to sign in as Guest Users and then assign accommodations in the TA Interface during the approval process.

This script describes the presentation of items and tools in the secure browser for the Grade 7 FSA Mathematics practice test. This script is intended to provide instruction for all aspects of the practice test. However, test administrators should modify the script as appropriate to the needs of the participating students. Test administrators may, for instance, feel that it is unnecessary to describe each item type in great detail. In that case, they may consolidate the item type section of the script as they see fit, using the instructions in that part of the script to answer questions as needed. Test administrators may also find it helpful to project the practice test and walk through items along with students.

This script also includes instructions for test administrators to create a training session for students to log into. FDOE strongly recommends that TAs and schools use this method to conduct their practice tests to ensure a similar login process to what students will experience during operational testing. The login portion of this script will need to be modified to match the login process if a Guest Session is used instead of a training session.

To keep a record of students who have participated in the practice test, you can print the session information that will display in the TA Training Site. By having students log into the practice test with test tickets, their names will display in the TA Training Site, and you can then print this page for your records.

Before Beginning the Practice Test

1. Before students arrive, ensure that the testing room is prepared as it will be on the day of the test.
2. Ensure that each student has a pen or pencil and a piece of paper to work the problems.
3. Ensure that all software applications, including Internet browsers, are closed on all student computers or devices before testing begins.
4. If your school will be providing handheld scientific calculators on the day of the operational test, ensure all students receive a calculator to use for Session 2 of the practice test.
5. Ensure that each student using the text-to-speech accommodation has headphones or earbuds. Plug headphones or earbuds in and adjust volume prior to launching the secure browser.
6. Launch the secure browser on student computers or devices prior to beginning the test session.
7. Click Go to the Practice Test Site in the blue box in the lower left corner of the browser.
8. Ensure students have been assigned the correct accommodations in TIDE.
9. Ensure that you have a test ticket printed from TIDE for each student and ensure that the test tickets display their First Name, Username, and other appropriate information.

Create a Practice Test Session

1. Go to the FSA Portal, click **Test Administration**, and then click **TA Training Site**.
2. Click **TA Training Site** and log in using your email address and password.
3. Select **Grade 7 Mathematics Practice Test** (Mathematics > Grades 7-8, Grade 7 Mathematics Practice Test), and then click **Start Practice Session**.
4. Record the Session ID, which students will use to log in to the test. The Session ID should be displayed where it is visible to all students. The Session ID for the practice test will begin with TRAIN. **If the Session ID does not begin with TRAIN, stop the session and follow steps 1–3 in this section again.**

**Note**: As a security measure, test administrators are automatically logged out of the TA Training site after 90 minutes of test administrator and student inactivity. A session will remain active if students are waiting for approval, if students are actively taking the test, or if the test administrator is interacting with the TA Training Site.

When reading the following script, please note that optional words are italicized and in parentheses.

**Beginning the Practice Test**

| SAY | Today, you are going to learn how to use the secure browser, the test platform you will use to take the computer-based Florida Standards Assessments. This practice test is designed for students who will take the Grade 7 FSA Mathematics Assessment using the text-to-speech and/or masking accommodation(s).

You will be given a work folder on the day of the test to help you work the problems during each session of the FSA Mathematics tests; however, today you may use your own paper.

Remove all materials from your desk except your pen or pencil and scratch paper. Your computer or device should be opened to the Please Sign In screen. Please follow my instructions, and do not change screens until I tell you to do so.

Now, look at the login screen. If you do not see this screen, raise your hand. |

If a computer or device does not display the login screen, open the secure browser on that computer or device and navigate to the practice test login screen.

| SAY | Please sit quietly while I distribute the test tickets. Do not begin typing until I tell you to start. |

Distribute the test tickets.

| SAY | Look closely at your test ticket and make sure it has your correct name, date of birth, and ID number on it.

Do not sign in before I instruct you to do so.

Raise your hand if you do not have the correct ticket. |
If a student has the wrong ticket, give the student the correct ticket. If you do not have the correct ticket, contact your school assessment coordinator.

**Display the Session ID for students.**

<table>
<thead>
<tr>
<th>SAY</th>
<th>Make sure the box for <strong>Guest User</strong> is switched to OFF. Enter your First Name as it appears on your test ticket and enter your Username. Make sure that the box for <strong>Guest Session</strong> is switched to OFF and enter the Session ID TRAIN-_____-____. The first box will already be entered for you. The Session ID is displayed for you. Click <strong>Sign In</strong>. Raise your hand if you need assistance.</th>
</tr>
</thead>
</table>

Pause and assist students with logging in as needed.

<table>
<thead>
<tr>
<th>SAY</th>
<th>Now, you will see a screen that says <strong>Is This You?</strong>. Select <strong>Yes</strong> to continue. Now, you will see a screen that says <strong>Your Tests</strong>. On this screen, you will see the test you are going to take today, the Grade 7 Mathematics Practice Test. Click the arrow beside <strong>Start Grade 7 Mathematics Practice Test</strong>. While you are waiting for your practice test to be approved, you will see a <strong>Waiting for Approval</strong> screen. This screen includes your first and last names, the Session ID, and the test you will take. If any information looks incorrect, please raise your hand. Otherwise, please sit quietly while I approve your tests.</th>
</tr>
</thead>
</table>

In the TA Training Site, select the **Approvals** button to review the list of students ready to begin testing.

To confirm accommodations for students, click the Test Settings icon and check that Text-to-Speech and/or Masking are set to **On**. If a student does not have the correct accommodations set, have him or her log out of the practice test and contact your school assessment coordinator to update the accommodations in TIDE. Once you ensure all students have the correct accommodations set, approve students into the practice test by selecting **Approve All Students** and selecting **Yes** on the **Important!** pop-up window.

**Read the following SAY box if you are administering tests to students using the text-to-speech accommodation. (If no students are using this accommodation, skip the following SAY box.)**

| SAY | If you are taking the practice test using text-to-speech as an accommodation, you will now see a screen that says **Audio Checks**. This screen allows you to make sure the text-to-speech tool is working. You can also set Volume, Pitch, and Rate using the selectors on the screen. *(Please note: Adjusting volume on this screen is not an option if using an Internet browser for practice tests. If necessary, students may adjust volume using their computer/device volume settings.)* Put your headphones or earbuds on now. Click the speaker icon and listen to the audio. Choose the settings that work best for you and then select **I heard the voice**. A green tab with a checkmark will appear in the upper-right corner of the text-to-speech section. If you do not hear the voice, please raise your hand now. Now, click **Continue**. |
Assist students with their headphones/earbuds setup and contact your school or technology coordinator for assistance, if needed. After all students have completed the text-to-speech setup,

**SAY** You should now see a screen that says *Help Guide and Test Settings*. Do not click *Begin Test Now* until I instruct you to do so.

Click *View Test Settings*. You should see a screen that says *Review Test Settings*.

This screen allows you to choose the print size, background color, and mouse pointer for your test. If you would like to change your selections, do so now. You should see your changes made on the screen once you select them. You can click *Undo Changes* to return to previously selected settings. If you have any questions, raise your hand.

Click **OK** to save your changes and return to the *Help Guide and Test Settings* screen.

Below the *Test Settings*, click *View Help Guide*. You should see a screen that says *Help Guide*. Take a moment to review this screen. These instructions show you how to navigate in the test and how to use the tools and features of the testing site. We will discuss these tools in more detail on the next screen. These instructions are also available for you to reference in the practice test. *(Pause.)* Click **Back** to return to the *Help Guide and Test Settings* screen.

If you have any questions, raise your hand.

Answer any questions.

**SAY** Now, click *Begin Test Now*, but do not begin yet.

Pause to make sure that all students have the first question on their screens. Help students if necessary.

**SAY** First, we will review the tools that are available to students with certain accommodations.

**Read the appropriate instructions on the following pages for accommodations applicable to students taking the practice test.**

**Text-to-Speech**

**SAY** If you are using **text-to-speech** as an accommodation, listen as I review the tool for this practice test.

To access the Text-to-Speech tool click the three horizontal lines above the response area to open the context menu.

Select **Speak Question** to have the question and options read aloud.

To have the voice read a single answer option, open the context menu and select **Speak Option**. You will then click the option you would like to have read aloud. You can also have an answer option read aloud by right-clicking on that answer option and selecting **Speak Option**.
SAY

If you wish to hear only a portion of an item, select the text you want to have read aloud and then open the context menu. Click **Speak Selection** to have the selected text read aloud.

To pause the voice while it is reading, select the context menu again. Click **Pause Speaking**. To restart the voice from the point at which you paused, click **Resume Speaking**.

To stop the voice while it is speaking, open the context menu. Click **Stop Speaking**. To hear the question again from the beginning after you have stopped the voice, open the context menu and click **Speak Question** again.

To make adjustments to the text-to-speech settings, click on the System Settings tool, which is above the Zoom buttons and looks like a wheel. Here you can adjust the volume, pitch, and rate of the Text-to-Speech tool. When you have finished adjusting your text-to-speech settings, select **OK** to exit and save your changes or **Cancel** to exit without saving your changes. Note that if you adjust your volume settings while the Text-to-Speech tool is in use, the volume will not adjust until after you select **OK**.

Now, practice using the Text-to-Speech tool. Raise your hand if you have any questions.

Answer any questions.

**Masking**

SAY

If you will take this test using **Masking** as an accommodation, listen as I review the tool for this practice test.

The Masking tool allows you to hide portions of the screen. To access the Masking tool within an item, click the button labeled **Masking** in the upper right corner of your screen. The button has a picture of a shaded square on it. When you have selected the tool, the button will turn orange.

To mask a portion of the screen, click the left mouse button and drag until the gray square covers the portion of the screen that you would like to mask. Then, release the mouse button. The area will be masked.

To remove the masking, click the close button in the upper right corner of the masked area. The close button is a circle with an X in the center.

Now, practice using the Masking tool. Raise your hand if you have any questions. *(Pause while students practice using the Masking tool.)*

To turn the Masking tool off, click the **Masking** button again. The button will revert back to its original color.

Are there any questions?

Answer any questions.
SAY | Now, listen as I describe the screen.

In the top left corner of your screen, you will see the navigation buttons.

The **Back** and **Next** buttons can be used to move to the previous or the next question. The Back button is not available right now because you are on the first question, but it will be available for later questions.

Click **Next** now. Because you have not yet entered an answer for this question, you will see a pop-up message that warns you that you have not entered a response to one or more items on the page. If you wanted to proceed without answering, you would select Yes. To remain on the page, you would select No. At this time, click **Yes** to proceed to the second question. *(Pause while students move to the second question.)*

To the right of the Next button, you will see a **Save** button. The Save button allows you to manually save your work. This is an optional feature. If you do not click this button, your answers will be saved automatically every two minutes.

Now, click **Back** to return to the first question. Choose **Yes** when the same pop-up window appears to warn you that you have not yet entered a response. *(Pause while students return to the first question.)*

Once you have returned to the first question, look to the right of the Save button where you will see the **Pause** button. The Pause button allows you to pause and exit the test. Do not click the Pause button at this time.

Are there any questions?

Answer any questions.

SAY | Now, I will describe several tools that may help you with this computer-based test, and you will practice using them.

At the top right corner of your screen, find the **Formulas**, **Line Reader**, and **Zoom** buttons. Select the **Formulas** tool. A pop-up window displaying the Grade 7 FSA Mathematics Reference Sheet will appear. You will need to scroll all the way down and, if necessary, use the horizontal scroll bar at the bottom of the screen to see all of the information on the reference sheet. Take a moment to scroll through the information presented in the **Formulas** window. *(Pause.)*

Move the **Formulas** window around the screen by clicking on the bar in the top of the window and dragging it to another part of the screen. *(Pause.)*

Now, close the **Formulas** window by clicking the X in the circle at the top right corner of the window. *(Pause while students close the Formulas window.)*

Next to the Formulas button, find the **Line Reader** button. The Line Reader tool helps you track line by line as you read a question. Now, select the **Line Reader**. When you have selected the tool, the button will turn orange. Select one of the answer options for this question and the line reader will move to that line. You can move the Line Reader on the screen with the up and down arrows on your keyboard or by clicking on a line of text with your mouse.
Practice using the Line Reader tool on the screen. *(Pause while students practice using the Line Reader.*) Now, select **Line Reader** again to turn off the tool. The button will revert to its original color. Note that the Line Reader tool will turn off when you use some of the tools, like zoom, or are answering certain item types on the test.

Next to the Line Reader button, find the **Zoom Out** and **Zoom In** buttons. You can use these buttons to decrease and increase the size of text within the test page. Four levels of magnification are available. Now, practice using the Zoom Out and Zoom In buttons to find the zoom level with which you are most comfortable. *(Pause while students practice using the Zoom buttons.)*

At the top right side of the page, above the zoom buttons, find a small question mark mark in a circle. This is the **Help** button. Now, click the **Help** button. A pop-up window with the Help Guide, including an Overview of the Test Site, Test Rules, and Accessing Context Menu Tools, will display.

*(If you are using the text-to-speech accommodation, you will see a small green square with a speaker icon inside and a small red square with a dark red circle inside above the Contents box. These are your text-to-speech tools for this page only. As the instructions next to these boxes indicate, you can select any of the text within the Help Guide screen that you want to hear and then select the green button to hear that text. To stop the text playback, select the red button. Remember that this is how you will use text-to-speech only for this page.)*

Note that, as with the **Formulas** window, you can click and drag this pop-up window around the page if needed. To change the size of the window, you can drag and extend the bottom right corner or the bottom and right sides of the box. This is the same screen that you reviewed before beginning your test. These instructions remind you how to navigate from one item to the next and how to use the tools and features in the testing platform. Take a moment to scroll through these instructions. Raise your hand if you have any questions about the information in the Help Guide. *(Pause. Answer any student questions.)*

Now, close the Help Guide by clicking the X in the circle at the top right corner of the Help Guide window. *(Pause while students close the Help Guide.)*

Are there any questions about any of the tools?

Answer any questions.

Now, look to the right of the question and find three horizontal lines in a circle. This is the **context menu**. Click the lines to open the context menu.

First, you will see a circle with a lowercase “i,” a flag icon, a notepad, a grayed-out line that says Highlight Selection, and a set of letters with a horizontal line through them. Click the lowercase “i.” *(Pause.*) This is the **Tutorial** tool. A pop-up window will open that displays a video tutorial of this item type. There is no sound available for this tutorial. You can also access the tutorial by right-clicking, if available on your device, in the question and answer area and clicking Tutorial. Now, close the video tutorial by clicking the X in the circle at the top right corner of the pop-up window. *(Pause while students close the tutorial.)*
Now, select the context menu, and then click the flag icon for Mark for Review. This feature will allow you to flag a question that you might want to review at a later time. You can mark an item for review by using the context menu or by right-clicking, if available on your device, in the question and answer area and selecting Mark for Review. Once you mark an item for review, the solid rectangle around the number for the item in which you are working will show the top right corner folded over, and the item number in the drop-down list at the top left corner of the screen will have a flag icon next to the number.

After you finish reviewing a question, return to the context menu and select Unmark Review Item. You can also right-click, if available on your device, and select Unmark Review Item. The item number will revert to a solid rectangle, and the item number in the drop-down list will no longer have a flag icon. Now, practice selecting Mark for Review and Unmark Review Item. (Pause.) For now, leave this question marked for review.

Now, select the context menu and then select the notepad icon. The Notepad tool will appear in a pop-up window. If you want to make notes for later reference, you can type them into this window. There is a new notepad for each question. To view your notes, you will need to return to the question where you typed the note and select the Notepad icon. As with other windows, you can click and drag this pop-up window around the page if needed. Now, practice typing text into the notepad. These notes are not included as a part of your response, but they are monitored by the testing contractor. (Pause for students to practice using the notepad.)

Notes that you save in the notepad will be saved for the duration of this test. To close the notepad without saving the notes you have typed, click Cancel. To save the notes you have typed and close the notepad, click Save and Close. Now, close the notepad. (Pause.)

You can use the Highlight Selection tool to highlight portions of a question. To highlight, click and drag to select the text you want to highlight. Then, right-click in the highlighted area and click Highlight Selection. There are four colors available for highlighting: Yellow, Orange, Mint Green, and Lavender. Select a color, and your text will be highlighted. You cannot highlight over previously highlighted text. To change the highlight color of your selection, you will need to remove or reset the highlighting and then highlight text in a different color.

To remove all highlighting, right-click in the item, then select Reset Highlighting from the context menu. To remove only certain portions of highlighting, select the text you want to remove highlighting from, right-click, and choose Remove Highlight. Practice highlighting and removing highlighting from words in the question. (Pause.)

Now, select the context menu, and then select the set of letters with a line through them, which is the Strikethrough tool. You can use the Strikethrough tool to cross out answer choices that you have eliminated as possible correct answers. Click on answer option A. You should see a gray line through answer option A.

Note that using Strikethrough on an answer option you have previously chosen does not automatically remove your selection of that response. Strikethrough is only available for multiple-choice and multiselect item types. To remove a strikethrough, click on the eliminated option. Click anywhere outside of the box around the answer choices to turn off the Strikethrough tool. Now, practice adding and removing strikethroughs. (Pause.)
In the top left corner of your screen, you will see a drop-down menu with the word “Items” and up and down arrows. This is the Item Summary drop-down list. Now, click to open the list. You will see the item numbers. The Item Summary allows you to quickly move to different questions. You can use this drop-down list to revisit questions you have already seen, or to see the next question. Items that are unanswered or marked for review are indicated in the drop-down.

Are there any questions about any of these tools?

Answer any questions, and make sure all students can use the tools. Help students if necessary.

Now, we will look at the types of questions you will see throughout the test.

Question 1 is a multiple-choice question. This question type requires you to choose the answer you think is correct. To begin, you will read the question or instructions on the screen. After you finish reading the question, read the answer choices. Finally, click on the button next to an answer option to select your answer. The button will become filled in. To remove your selection, click the button again.

Now, click Next to move to Question 2. If you have not selected an answer, you will receive a message alerting you that you have not selected an answer. While we are discussing these item types, click Yes each time this message appears.

Question 2 is a table match item. This item type presents options in columns and rows. Options may include words, phrases, sentences, quotations, line/paragraph/passage numbers, or images. Click the box that matches the correct option from a column with a correct option from a row. Typically, there is only one correct option per row or column, but the number of correct answers may vary. To remove a checkmark, click the selected box again.

Click Next to move to Question 3, which is an equation editor item. This question type requires you to create a response or an expression using buttons or the keyboard. To begin, you will read the question or instructions on the screen. After you finish reading the question, use the buttons on the screen to create an answer. You may also use the keys on the keyboard to create an answer. Note that this tool is not a calculator. It will not perform calculations for you. It only allows you to enter the response or expression required to answer the question.

Begin by clicking in the answer space, which is the blank box below the instructions and above the equation buttons. Once you click in the answer space, you will see a cursor. Practice entering some numbers into the space now. You can either click the numbers on the screen or use your keyboard. (Pause.)

The arrows on the top left of the equation buttons panel allow you to move back and forth between characters you have typed into the answer space. You can also use the arrows on your keyboard or click on the space to which you want to move your cursor. Practice moving back and forth in the answer space now. (Pause.)

The arrows in the middle of the top row of the equation buttons panel allow you to undo and redo your last action. The square arrow with an “x” in the middle at the right side of the top row of equation buttons is the delete button. The delete button can be used to remove parts of the answer. You can also use the backspace or delete keys on your keyboard.
**SAY**

Practice using undo, redo, and delete now. *(Pause.)*

For this question, you will see the numerical keypad, along with the decimal point, negative sign, and fraction button.

The fraction button will create two boxes to form a fraction, with one box for the numerator and the other for the denominator. When you click the fraction button, your cursor will automatically move to the numerator. You will enter a number for the numerator and then use the down arrow on your keyboard or click in the denominator box to move to the denominator. Note that you can add multiple numbers and symbols in both the numerator and the denominator. To move outside of the fraction, use the arrow buttons or click outside of the fraction to move your cursor.

On other equation editor items, the keypad may also include keys for additional functions and variables.

Practice responding to Question 3 now. *(Pause.)*

Are there any questions about equation editor items?

---

Answer any questions.

**SAY**

Now, click **Next** to move to Question 4. You can also select the Item Summary at the top left corner of the screen and select 4.

Question 4 is a graphic response item display (GRID) item. Different GRID items will require you to respond in different ways. For questions like this, you will see a graphing answer space. The Add Point tool allows you to plot points onto the graph. Click the **Add Point** button. Then click on the graph where you want to add a point. To move a point after it has been placed, select the small circle arrow button at the top left of the graphing area. Then, click the point and drag it.

You can use the **Connect Line** tool to connect two or more of the points that you have added to the graph. Do this by first selecting the **Connect Line** button and then clicking on the first point and dragging the line to the second point. A line will appear between the two points. You can also add a line without first adding points. Select **Connect Line**, click where you want your first point to appear on the graph, and then drag until you have drawn the line you want. To move the line after it has been placed, select the small circle arrow button and then click on a point and drag it to make the line you want. To delete a point or a line, select the **Delete** button at the top of the graph and then click on the line or point you want to delete. You can also delete one of the points to which the line is connected by clicking on that point. Deleting a point to which a line is connected will delete that line.

When you are finished responding to the question, check to make sure that the answer space does not have any extra objects that do not belong. For some of these question types, you will use an **Add Arrow** button, which will create a line with arrows between points. The **Add Arrow** button will function the same way as the **Connect Line** button. *(Pause.)*

Now, click **Next** to move to Question 5.
Question 5 is a table item. This question type requires you to click in the blank cells in the table and type in your responses. Only numerical values are accepted for table items. If you enter a non-numerical value into the box, you will receive an error message. Practice clicking in the blank cells and typing responses. (Pause.)

Click Next to move to Question 6, which is another multiple-choice question. We are going to continue past the items that are similar to those we have already discussed, but you will be given the chance to come back to them later. Click Next.

Question 7 is another GRID item. For this GRID item, click the grid area to complete the dot plot. To move a dot you have placed on the grid, click above another number. Click Next.

Question 8 is a multiselect item, which requires you to choose all of the answers you think are correct. First, you will read the question or instructions on the screen. After you finish reading the question, read the answer choices. Finally, click on the button next to the answer options you want to select. A checkmark will appear in the box. To remove a checkmark, click the selected box again.

Sometimes, this question type will tell you a specific number of items to select. Others, such as this question, ask you to select all correct options without specifying a number. You will have either five or six options to select from on a multiselect item. Click Next.

Question 9 is another GRID item. This GRID item asks you to drag the object to the correct place on the number line. To change your answer, drag the object to another place in the answer space.

Click Next to move to Question 10, which is a hot text item. For this item type, you will select statements to answer the question. Click on your answer and it will be highlighted and marked with dotted lines around the outside. To remove your selection, click the selected statement again. The highlighting and dotted lines will be removed, allowing you to choose a new statement as your response.

You may now begin Session 1 of the practice test. Return to Question 1 and read and respond to each question while practicing using the tools available for this session. There are 10 practice items in this session.

Remember, if you need assistance understanding how to answer a question, you can click the Tutorial button, which is the lowercase “i” under the context menu. Raise your hand if you have any questions.

Walk around the room and assist students as necessary. After students have had sufficient time to practice using the tools and answer the questions, review the correct responses to Session 1 with the students. The answer key can be found on the FSA Portal at: http://fsassessments.org/students-and-families/practice-tests/computer-based-practice-test-answer-keys/.

When you have finished answering questions in Session 1, navigate to Question 10 by clicking Next or by using the Item Summary to select 10.

Now, we will practice how you will exit the test if you need to leave the room for an extended period of time during the actual test.
The Pause button allows you to pause and exit the test for an extended period of time. Now, click Pause. (Pause for students to click the button.) A pop-up window will appear and ask you to confirm that you want to pause the test and to ask your test administrator before pausing your test. You should then verify with your test administrator whether you should pause your test. For today, click No. On the day of the test, if you have your test administrator’s permission, you will click Yes.

Pause while students click No.

Now, we will move to the next session to finish describing all item types in this practice test.

From Question 10, click Next to access the review screen. On this screen, you have the option to review any unanswered or flagged items or to complete Session 1.

If you marked any questions for review, you will see a flag icon next to the question number reminding you that you marked that item for review. If you wanted to review your response, you would click on the item number with the flag in it. You would then be taken back to the question you had marked for review. If you had left any questions unanswered, those questions would also be indicated on this screen with a triangle. Do not select the question number to review your answer at this time.

Click End Session. A message will appear, asking you if you want to pause your test. Click Yes. You will be brought back to the Please Sign In screen.

Students will be returned to the login screen. This simulates how they will exit after Session 1 of the operational test. Wait two minutes and then have students log back in using the instructions at the beginning of this script. Approve students to enter the practice test again. Students should proceed through the opening screens and click Begin Test Now to start Session 2.

You should now see Question 11 on your screen. If you do not see Question 11 on your screen, raise your hand.

Pause and assist students with logging in as needed. If your school is providing handheld scientific calculators to students, distribute the calculators now.

We will now complete Session 2 of the practice test.

During Session 2, you will see the Calculator tool to the right of the Formulas tool. Select the Calculator tool. Like the Formulas window, you can click and drag the pop-up calculator window around your screen if needed. Click the buttons of the calculator to enter numbers and functions. You can also use your keyboard. Practice using the calculator to solve a simple problem such as one plus two. (Pause.) You will have more time to practice using the calculator later in the practice test.

Now, close the calculator by clicking the X in the circle at the top right corner of the Calculator window. (Pause while students close the calculator.)

Now, click Next and then Yes on the pop-up window to move forward until you reach Question 14, which is an open response item. This type of question requires you to type your answer into an answer space with your keyboard. Click in the answer space and practice typing a response. (Pause.) Click Next.
Question 15 is an edit task with choice item. For this item type, you will find each answer blank, click the down arrow, and select the best answer from the drop-down list. Repeat this for each blank in the item.

Click **Next** until you reach Question 20, which is another equation editor item. However, this item contains additional features.

The features on the right side of the numbers buttons panel are for special functions that will allow you to create more complicated equations or expressions. These buttons will vary based on the question. If your keyboard has the equivalent of these buttons, you may use your keyboard to use that function as well.

For this question, you will see the following special buttons:
- On the first row is the variable $x$.
- On the second row are the add, subtract, multiply, and divide buttons.
- On the third row are the less than, less than or equal to, equal to, greater than or equal to, and greater than buttons.
- On the fourth row are the exponent, parentheses, absolute value, square root, $n$th root, and pi buttons.

The exponent button will allow you to add an exponent to a previously entered numeral. Once you have entered the base number, select the exponent button. The cursor will move into the higher box for the exponent. Enter the exponent number. Use the right arrow, either on the screen or on your keyboard, to move out of the exponent function.

The parentheses button will create a pair of parentheses. The absolute value button will create a pair of bars. Once you select the parentheses or absolute value button, your cursor will automatically move inside the parentheses or bars. Move the cursor outside of the parentheses in order to continue your equation.

The square root button will create a box set as the active region under a square root. When you select the $n$th root button, your cursor will automatically move to the index. You will enter a number for the index and then use the right arrow on your keyboard or click in the radicand box to move to the radicand.

The pi button creates the pi symbol. Use the right arrow on your keyboard or click in the space to the right of the pi symbol to move the cursor.

Practice using the special function buttons for this equation editor item. On other questions, the special function buttons might also include variables. Be sure to practice using all of the equation buttons. Raise your hand if you have any questions.

Click **Next** until you reach Question 26. Question 26 has three parts. Part A is an equation editor item, part B is a GRID item, and part C is a multiselect item. You must answer each part to receive credit. Now, click **Next**.

Question 27 is another equation editor item, but for this item the keypad has to be opened from within the answer area. To begin, you will read the question or instructions on the screen. After you finish reading the question, you will click the keyboard icon in each answer area. A cursor will appear inside the answer area and the keypad will open in a window at the bottom.
of the screen. Use the buttons on the keypad to create your answer. To close the keypad, click the X, found in the top right corner of the window. In order to see if the keypad has additional functions and buttons, you must open the keypad for each answer area. Remember that this tool is not a calculator. It will not perform calculations for you. It only allows you to enter the response or expression required to answer the question. Practice locating the answer areas and entering some numbers or expressions into the space now. You can either click the numbers or functions on the screen or use your keyboard. (Pause.)

Now, you may begin Session 2 of the practice test. Return to Question 11 and read and respond to each question while practicing using the tools available for this session. Do not click the End Test button until instructed to do so.

Remember, if you need assistance understanding how to answer a question, you can click the Tutorial button, which is the lowercase “i” under the context menu. Raise your hand if you have any questions.

After students have had sufficient time to practice using the tools and answer the questions, review the correct responses to Session 2 with the students. The answer key can be found on the FSA Portal at: http://fsassessments.org/students-and-families/practice-tests/computer-based-practice-test-answer-keys/.

Now, we will practice how you will submit your test when you have completed Session 2.

From Question 27, click Next to access the review screen. Remember that the review screen will show you any Session 2 questions that are unanswered or marked for review and allow you to return to those questions by clicking on the question number. Do not select a question number to review your response at this time.

Click End Test at the bottom of the screen. You will see a message that directs you to click Yes to submit your test. Click Yes.

A message will appear that reads “You have reached the end of the test. Click Submit Test to submit your test.”

Click Submit Test at the bottom of the screen. A pop-up will appear asking if you are sure you want to submit the test. Click Yes.

You will now see a message that says “Practice Test Completed.” Click Log Out.

After students have logged out, check each computer or device and make sure that each student has exited the test properly. Help students as needed. Provide students with the practice test URL (http://fsassessments.org/students-and-families/practice-tests/) so they may access the practice test on their own.
